Professional Summary

Electronics and Telecommunication undergraduate with a strong foundation in embedded systems, robotics, and control systems. Experienced in developing hardware-software integrated solutions using microcontrollers, computer vision, and automation technologies. Passionate about building practical engineering systems for healthcare, automation, and smart infrastructure applications.

Education

Vishwakarma Institute of Technology, Pune B.Tech in Electronics and Telecommunication Engineering	2025 – Present
Sanjivani K.B.P. Polytechnic, Kopergaon Diploma in Mechatronics Engineering	2022 – 2025
Seva Niketan Convent School, Kopergaon SSC	2021

Technical Skills

- **Programming:** Java, Python, Embedded C
- **Embedded Systems:** STM32, ESP32, Raspberry Pi
- **Core Electronics:** Analog Electronics, Digital Electronics, Control Systems
- **Communication Protocols:** UART, SPI, I2C
- **Robotics & AI:** Computer Vision, Gesture Recognition, Sensors and Actuators Interfacing
- **Tools & Platforms:** Scilab, ERP Management Systems, Linux Basics
- **Productivity Tools:** MS Excel (VLOOKUP, Pivot Tables)

Projects

Automatic Self-Parking Chair After Clap

- Developed an automated chair positioning system activated using clap detection.
- Integrated sound sensors with microcontroller-based motion control.

Gesture-Controlled Motor Speed Using Computer Vision & Arduino

- Designed a real-time hand gesture recognition system for motor speed control.
- Combined OpenCV-based gesture processing with Arduino motor interfacing.

Sahyog: Empowering Lives with Robotic Precision and Care

- Developed a robotic hand prototype to assist physically challenged individuals.
- Focused on precision control, accessibility, and healthcare-oriented automation.

Transforming Library Management with ERP Integration

- Worked on ERP-based library module integration during internship.
- Contributed to book import functionality and library data management workflows.

Internship Experience

Clicker Services Pvt. Ltd. Intern	Jan 2025 – Jul 2025
---	---------------------

- Worked on ERP system development in collaboration with Sanjivani Group of Institutes.
- Contributed to development and integration of the library management module.
- Gained practical experience in software workflows, testing, and deployment.

Achievements

- Secured **2nd Prize** in the Medical and Healthcare Technology domain at **DIPEX** for the project: *Sahyog: Empowering Lives with Robotic Precision and Care*

Awards & Honors

- Appreciation Certificate from HR Team during internship.

Certifications

- **Research Publication:** Smart Water Leak Detection System Using Low-Cost Paper-Based Capacitive Sensor for Sustainable Urban Infrastructure
Indian Institute of Industrial Engineering
- Hands-On Training Workshop on Arduino (09/2024)

Languages

- English – Professional Proficiency
- Hindi – Professional Proficiency
- Marathi – Native Proficiency
