Subject: Request for Formal Project Sponsorship & Hardware Support for Industrial EV Charger Project

Respected Sir,

We extend our sincere gratitude for the opportunity to interact with your technical team and for considering our project proposal to work under the industrial mentorship of **Sawant Automation**.

Following our recent technical discussion, our team has agreed to undertake the development of a **Variable CC/CV (Constant Current / Constant Voltage) Power Supply for EV Charging Station** utilizing the 1800W Boost Converter module platform. The objective of this project is to build a complete, workshop-ready EV benchtop charging unit featuring a custom rugged enclosure, external CC/CV panel controls, active thermal cooling management, real-time telemetry metering, and safety protection circuits.

To ensure the successful execution, fabrication, and testing of this system within our target timeline, we kindly request **Sawant Automation** to formally sponsor this project and support us with the necessary raw components, module hardware, and testing facilities as required during the build phase.

Under my mentorship our team will ensure that the system is designed to industrial standards. Upon completion, all technical documentation, CAD models, wiring schematics, and test validation reports will be submitted directly to Sawant Automation.

We kindly request you to issue an official project acceptance letter confirming the sponsorship and granting permission for our team to proceed with the build.

Thank you once again for your valuable support, guidance, and industry partnership.

Yours sincerely,

Student Project Team:

1. Sudarshan Anil Chaudhari.(PRN- 12520111)
2. Tanvi Nilesh Kokane.(PRN- 12520138)
3. Shreya Mallikarjun Horti.(PRN- 1252100005)

Department: Electronics and Telecommunication Engineering.

Institute: BRACT'S Vishwakarma Institute of Technology, Pune.
